SKILLS

- **React**
- **Express**
- **Data structure**
- **Docker**
- **Python (Basics)**

- **C**
- **C++**
- **Git**
- **kubernetes**
- **Java (Basics)**

- **HTML**
- **CSS**
- **JavaScript**
- **DBMS**

WORK EXPERIENCE

Fresher

PERSONL PROJECTS

Python Voice Assistant

On Device Voice assistant with multiple API configuration

- It is a smart AI assistant that responds to voice commands, helping with tasks like reading news, checking the weather, and sending emails.
- It fetches and reads out the latest headlines from reliable news sources, keeping you informed about current events.
- Beyond news, it can set reminders, calculate answers, play music, open websites, and manage system tasks like shutdown or restart.

Note Taking Application

HTML, CSS, JavaScript Based Application

- CRUD Functionality with Local Storage: The project allows users to create, read, update, and delete notes, with data persisted in the browser's local storage.
- Dynamic UI Updates: The UI is dynamically updated to display notes, allow searching by title, and reflect changes when notes are added or deleted.
- Basic JavaScript Features: The app demonstrates the use of event handling, DOM manipulation, and interaction with local storage for persistent data storage and retrieval.
